I've worked in different roles on various sets, from runner to director. A carefully chosen location, meticulously planned logistics and a well-organized backset not only allow the production to save time and money, but above all encourage the cast, artistic crew and technicians to give their best. Everything is translated into the film: the "production value" also passes through here, although unfortunately it isn't very often possible to dedicate the necessary resources to it during pre-production and production.

We are therefore happy to present the free services offered by the Ticino Film Commission in this booklet.

A handwritten signature in black ink, appearing to read 'Niccolò Castelli'. The signature is fluid and stylized, with a long horizontal stroke at the end.

There are more sunny days in Ticino than in Hollywood!

In Ticino – this isn't a legend - the sun often shines.

In Locarno, in an average year, there are 2'170 hours of sunshine, or 58% of the duration of the possible sunshine!

And cloudy skies are minimal: 43% in Lugano compared to 77% in Zurich.
