Catering

The museum has a small refreshment point with a coffee machine, tea and a water dispenser connected directly to the water supply. For events, catering is usually provided by local restaurateurs. Reusable tableware is used. There is separate collection for paper, aluminium and PET.

Mobility

It has municipal parking spaces in the village of Meride, including spaces reserved for people with disabilities. There is a charging station for electric vehicles and bikes. You can directly access the entrance of the museum for loading/unloading operations. It is accessible by public transport, with a bus connection from the FFS Mendrisio station.

Energie

It is heated by a heat pump. The lighting is entirely LED. The current building is relatively new and has a good level of insulation (buildings under heritage protection).

Waste management

Separate disposal of paper, PET, aluminium, glass, toner, batteries and other special waste is carried out. There are collection points for PET for the public.

Aweriness

The museum operates within the UNESCO site of Monte San Giorgio. It regularly collaborates with local and regional tourism organisations and promotes slow tourism through hiking activities, educational events and environmental education for schools and the general public. The entire facility is accessible to wheelchair user
